

PRODUCTION MANAGER

Job Description – Production Manager (Scaffolding Manufacturing)

Location: Noida, India

Industry: Scaffolding / Construction Material Manufacturing

Department: Production & Operations

Reports to: Director

Role Overview:

We are seeking an experienced and dynamic Production Manager to oversee the end-to-end manufacturing operations of our scaffolding products, including Cuplock systems and related accessories. The role requires strong leadership, technical know-how, and a results-driven approach to ensure production targets are achieved with quality, cost-efficiency, and safety compliance.

Key Responsibilities:

- Plan, organize, and manage daily production activities to meet delivery timelines.
- Supervise manufacturing processes including fabrication, welding, machining, galvanizing, and finishing of scaffolding components.
- Monitor production schedules, workflow, and resource allocation (manpower, machines, materials).
- Ensure adherence to quality standards, safety protocols, and regulatory compliance (ISO, BIS, etc.).
- Implement lean manufacturing, process improvement, and cost reduction initiatives.
- Coordinate with design, procurement, and sales teams for smooth order execution.
- Maintain optimum inventory of raw materials and finished goods.
- Prepare and analyze production reports, productivity metrics, and operational KPIs.
- Lead, train, and motivate production staff, welders, fitters, and supervisors to enhance efficiency and reduce downtime.
- Troubleshoot technical issues and ensure preventive maintenance of machines and equipment.

- Drive automation, standardization, and best practices in scaffolding manufacturing.

Qualifications & Skills:

- Education: B.Tech / Diploma in Mechanical Engineering, Production Engineering, or related field.
- Experience: 7–12 years in heavy fabrication / steel manufacturing industry; scaffolding experience preferred.
- Strong knowledge of welding, fabrication, and surface treatment processes.
- Hands-on exposure to ERP systems, production planning, and inventory control.
- Leadership, problem-solving, and decision-making abilities.
- Excellent communication and team management skills.
